Introduction

The Nevada Evaluation and Statistical Manual is a compilation of various reports, using a wide range of assessment and evaluation tools, developed for the Nevada Tobacco Prevention and Education Program and all tobacco control internal and external partners.

The data has been assembled from nationally recognized reports, State of Nevada general and special reports, and special interpretive reports designed by the Nevada Tobacco Prevention and Education Program.

The manual represents a commitment to evidenced-based evaluation process and for consistency in the reporting process for tobacco control throughout Nevada.

The Nevada Evaluation and Statistical Manual is comprised of the following reports:

- 2005 Nevada Adult Tobacco Survey (ATS): Special Data Analysis and Interpretive Report
- 2006 Nevada Tobacco Data Survey: Special Data Analysis and Interpretive Report
- Healthy People 2010 (HP 2010): Tobacco Data Report
- National Behavioral Risk Factor Surveillance System (BRFSS): Nevada Tobacco Data Report for 1995, 2000, and 2004
- National Youth Tobacco Survey (YTS): Tobacco Data Report for 2002 and 2004
- Nevada Behavioral Risk Factor Surveillance System (BRFSS): Special Data Analysis Report for State Total Smoking Prevalence 2000 – 2004 (Pending)
- US and Nevada Youth Risk Behavior Survey (YRBS): Tobacco Data Report for 2001 - 2005
